New School Nurse Handbook

Children and Youth Assisted by Medical Technology in Educational Settings

This pediatric hospital has designated primary care provider resources from the Indigent Care Trust Fund of the State of Georgia for this professional education project.

These excerpts have been taken from the Student Health Services Manual to provide you, the school health caregiver, and the school staff with general information on meeting basic health care needs of students in the school setting. However, please remember that these are only guidelines, and are not intended to replace your judgement as a caregiver, or to substitute for school policies or advice of a physician. Always consult your school administrator, the student's parent/guardian or health care provider if you have questions or concerns regarding the care of the student at the school. If a situation appears serious or life threatening always follow school policies regarding notification of the principal, and call 911 to seek emergency assistance immediately.
