

### **What are the new requirements for retesting?**

If the average standard score is 430 or better, the applicant may retake the test at any time, but remedial study is recommended.

If the average standard score is 400-429, a wait of three months or evidence of remedial study is necessary before retesting.

If the applicant's average standard score falls below 400, a wait of six months, or evidence of remedial study is necessary before retesting.

If you retest at a center other than your original testing site, you must obtain a release from the original Chief Examiner.

The cost of retesting is \$19.00 per test.
