

Internet Settings Required for Optimal Use of Home Access Center

Open your IE browser and access the following:

Tools >>> Internet Options>>>Security>>>Trusted Sites

Add a Trusted Site for: ***.fcs.org** and ***.fultonschools.org** if not added, and Save.

Make sure that Trusted Sites is still highlighted.

Click on the **Custom level** button

Scroll to the bottom of the Security Setting for Trusted Sites

Note the items in the red outlines. If your computer does not have these settings you may get inconsistent results when you attempt to Log Into Home Access, either as yourself if you have a child in FCS, or while impersonating a Parent to troubleshoot their login problem.
