CANVAS @ FCS

What does Canvas look like in the Classroom?

Canvas is a web-based learning management system, or LMS. Canvas LMS provides the essential digital foundation for learning, whether students are in face-to-face, blended, or virtual environments. Canvas is very intuitive and easy to use. It will be integrated with our current digital resources and will be a one-stop-shop for resources and learning. It's the classroom that goes where you go!

Who will use Canvas in Fulton County Schools?

During the 2023-2024 school year, all Fulton County High Schools will begin transitioning to the Canvas Learning Management System. High school teachers who are eager to get started with Canvas will have the option to use Canvas as their instructional LMS with students beginning in August 2023. Other teachers will be learning about Canvas during the 2023-2024 school year, and will begin using it as their instructional LMS in August 2024.

Families Introduction to Canvas

Come meet Dave, Fulton's Principal Learning Consultant from Canvas, and learn more about Canvas in Fulton County:

Tuesday, November 28th

What about Microsoft Teams?

During the 2023-2024 school year, some high school teachers will continue to use Teams as their instructional platform with students while they learn more about the Canvas LMS. As we transition to using Canvas in all high school classes (August 2024), Canvas will be our instructional LMS. If a teacher needs to meet with students online, this will be done through a Teams video meeting.

What is an Observer Account and How do You Create One?

The observer role can be given to parents, family members or guardians to give them visibility into the student's Canvas courses. Family members and guardians can set up an observer account and pair it with student account(s) using a student pairing code.

Mobile Access: You can log in via a web browser or download the Canvas for Parents mobile application in the AppStore or Google Play store to access your student's courses and grades.
