

Fulton County Schools Regional Science & Engineering Fair

Local Combined Scientific Review Committee (SRC) and Institutional Review Board (IRB) Documentation

School: _____ Science Fair Contact: _____

All GSEF affiliated fairs must have a Scientific Review Committee (SRC) & Institutional Review Board (IRB), which will be available both fall and spring semester. Please complete the following form and return it with your Affiliation paperwork.

- Your SRC must have a minimum of 3 people, including a biomedical scientist (#2) and an educator (#4).
- Your IRB must have a minimum of 3 people, including an educator (#4) and human subjects specialist (#5). An animal care specialist (#1) is required.
- A person may serve on both committees and may represent more than one skill. Details in the ISEF Document Library, www.societyforscience.org/committee-training, can be found in "Rules and Guidelines." In this case, separate boards rather than a combined board will be required.

Note: A person who has a role on any project as a parent, Adult Sponsor, Qualified Scientist, or Designated Supervisor cannot serve on the SRC or IRB for that project.

#1 Animal Care Specialist – required for every project involving nonhuman vertebrate animals
 #2 Biomedical Scientist (SRC)
 #3 School Administrator (IRB)
 #4 Educator (IRB and SRC)
 #5 Human Subjects Specialist (IRB) – someone knowledgeable about evaluating physical or psychological risk to subjects
