Yosef Mesfin, Founder of an investment Firm “Ace Capital investment Firm” and Trading team “forex guide”

Age: 17

The Business: Ace Capital Aims to provide weekly cashflow to investors of high capital. The minimum investment that can be made is 25k onto where you will get a certain percentage of profits made of that week. The money being invested will go into a global currency exchange market onto where it is traded such as stocks but instead with currency. This is just a start up but the future of this company is bright. “Forex Guide” on the other hand is a class on where i teach people how to trade on their own. For this has seen much success onto where people in my class have invested of at least $250 of their own capital and trade on their own. I provide education as well as what to buy and what to sell during the day. My students make roughly around $100-600 a week depending on what they invested and if we had a profitable week or not. The class Starts at $100 a month and currently have 15 students.

In 20 years, I will have...: My company will be extremely profitable, Ace Capital will be a National investment firm to where I will open offices in as many states possible and higher other trades to trade the money i will provide them split the profits from each trader 50/50. The goal of Ace Capital is to become a multibillion company and hopefully be able to one day open an office in wall street. As for “Forex Guide” in 20 years I will have many success stores to where my students have quit their 9-5 and started profiting from trading and hopefully turn into a full-time career. If some of the trades are good enough, they might get capital from me and go onto working for my company.

Best advice I’ve ever received: “whenever you fall, fall forward”
Inventors

- Elijah McCoy invented a device for oiling steam engines in 1872. The term “the real McCoy” is believed to be a reference about the reliability of Elijah McCoy’s invention.

- Garrett Augustus Morgan invented the first stop light. He sold his invention to General Electric Company. He also invented the gas mask that soldiers in WWI used.
National School Counseling Week is February 3-7, 2020 and it highlights the tremendous impact school counselors can have in helping students achieve school success and plan for a career. This week we recognize and appreciate our School Counselor Ms. Szymendera. Thank you for all you do to support our students.
