REMOTE LEARNING

Remote Learning is a strategy for learning continuity to be deployed for extended time away from school. During Remote Learning your students learning can happen anywhere. Review the lessons with your child and decide on the support your child will need through instructional accommodations or accessibility tools. Additional lessons for speech/language and/or occupational therapy have been provided as appropriate for select students.

**Instructional accommodations:** Allows students to participate in activities and lessons to make learning and demonstrating knowledge accessible for all.

**Suggestions/Tips**

- Preview lesson tasks/assignments
- Provide checklists for multi-step activities
- Break the task/assignment into parts
- Read directions/tasks aloud
- Repetition of directions
- Bold and highlight important text
- Provide a dictionary
- Review key vocabulary
- Ask students to look, touch and verbalize

- Ask students to look, touch and verbalize what they see and think
- Breaks from learning
- Extended time
- Check for understanding during task
- Visual Aids (picture, flashcards, etc.)
- Positive reinforcement
- Limit visual text to one page

Please see the Northwood Website for directions.

**Accessibility Tools:** Designed to make learning more accessible to students.

Link to FCS AT Universal Tools support channel via YouTube.

- **Snap and Read:** Utilize translation/read aloud features within text to speech applications to increase access to text o Quick Guide for Instructions (iOS)
- **Co-Writer:** Utilize word predict software to increase access to written expression o Quick Guide for Instructions (iOS)

**Communication with Special Education Case Manager:** Please contact your child’s case manager with any questions related to the provided instructional materials.

**Assistive Technology Support:** If your child has an assistive technology device (e.g. Novachat) and you have questions regarding how to operate the device, you can call the assistive technology help line at 470-254-5205. An assistive technology specialist will be answering these calls and assisting parents with any questions specific to AT devices.
