Cindy Weatherford

Ashley Agans
Principal

Dear Cambridge Family,

We hope this communication finds you well as we enter the last few weeks of the first semester. As you may have read or heard, the State of Georgia is de-commissioning the *Georgia Standards of Excellence* (which houses our current mathematics curriculum) and has adopted *Georgia's K-12 Mathematics Standards* beginning the 2023-2024 school year. These new mathematics standards will provide a balance between building procedural fluency and developing a deep conceptual understanding. Within this new curriculum model there will also be an emphasis on mathematical argumentation and mathematical modeling.

Although each individual mathematics teacher will explain placement options and provide academic guidance to his or her students during the pre-registration process in January, we would like to invite each family to the **Mathematics Night** at Cambridge High School on **Thursday, December 15th from 6:00 – 7:00 PM** in the **Media Center**. The purpose of this meeting is to provide families with an overview of the new mathematics curriculum, share the transition plan for ensuring that students have access to important mathematical skills and concepts as we retire one stable of courses and initiate new ones, and discuss the various pathways to graduation as afforded by the new curriculum. There will also be a Question-and-Answer period at the end of the presentation.

In the interim, feel free to visit the Fulton County Schools' Mathematics Department website at <https://www.fultonschools.org/Page/10446> for more information on the implementation of the new mathematics curriculum as well as curriculum documents for each individual course. The Director of Mathematics for Fulton County Schools, Mrs. Susan Baker, has produced a video which delves into these changes. You may find the video at <https://www.fultonschools.org/domain/8888>.

Sincerely,

A handwritten signature in blue ink that reads 'Brian Wynne'.

Mrs. Ashley Agans,
Principal

Dr. Brian Wynne,
Mathematics Department Chair
