- Vaping/Drug Issues:
 - Staff was educated about the dangers, consequences and usage of e-cigarettes. One consequence that has been proven is Popcorn lung disease, which is caused by the chemicals in the oils.
 - Discussed putting posters in bathrooms that will be funded by the county. This has been done already at multiple high schools.
 - Staff received additional curriculum from a Michigan State study that was completed.
 - Depending on survey results, we may consider having a parent seminar to discuss this topic. We also discussed having a SGC cluster meeting.
- Strategic Plan Monitoring Tool:
 - All members need to complete any necessary training and then notify Lauren so that she can update our monitoring tool. Please put strategic plan in subject line of e-mail, so that they can be easily identified.
 - We hope to have our preliminary budget numbers by the end of January and at that time our monitoring tool will need to be updated.
 - Marci has ordered a suggestion box to put at the front desk. Carol is working on making the HBMS website more user friendly for people to be able to identify SGC updates and make public comments.
- Principal's Update:
 - Our numbers for next year look lower. The estimate at this time is 684. Lauren has reached out to the staff to see if there are any intentions to leave HBMS in case we lose a position.
 - The county is still discussing the school calendar for next year. Many that attended the meeting did not like the proposed modifications.
 - Lauren will send out both of our parent surveys together and then a follow up will be in the weekly Eagle Edition. Community Outreach Committee will need to meet as soon as possible to discuss results and action items.
 - Erin King is our new NELC SGC contact.
